

Testimonials

"I encourage you to consider CCPE's Evidence-Based Medicine course and its new blended approach to learning. This should enable you to "Reach New Heights" in your credibility."

Richard Michalenko, Wyeth Pharmaceuticals, 2004 Jim Creaser Award recipient

"After writing several APMR advanced courses, I took a long break from the training. Only recently a new manager encouraged me to review the new CCPE courses. I was pleasantly surprised to see the quality of the new courses, the new technology and how easy it was to write the online exams. Well done everyone at CCPE!"

Pat Predy, Gold Medalist Merck Frosst August 2007

"Health Care in Canada is a must have learning guide for everyone in the Pharmaceutical community"

Jean-Paul Bédard, VP Corporate Affairs, BMS

"CCPE leadership has brought together diverse healthcare stakeholders to develop this enduring, – innovative and foundational program for our community"

Teresa Firestone, VP Sales at Pfizer on CCPE's updated Health Care in Canada program

"I invite you to continue pursuing your professional development by taking advantage of the Evidence-Based Medicine course and start stimulating your neurons again if you have been taking a break. Stimulating your brain with knowledge is as important as feeding your body with food. But particularly in a changing environment, it becomes absolutely EVIDENT!"

Louise Trépanier Trainer, Regional Sales at AstraZeneca Canada Inc
